**Notes:**

- On May 31, 2018, the Clean & Safe program adopted the counting methodology used by the Regional Task Force on the Homeless. Per the methodology, represented above by the dark green cells, Clean & Safe staff counts 1.75 individuals per visible tent/structure and 2.03 individuals per vehicle that shows clear signs of habitation. The former methodology (shown in yellow) counted two individuals per tent and two individuals per vehicle.

- The outreach area outlined above refers to Connections Housing; an organization that provides interim and permanent housing for homeless who are referred from the target area of First Street to 10th Ave. and Cedar to Broadway. The outreach area data reflects the number of homeless found sleeping in this target area. It does not reflect the number of residents living at Connections Housing. Connections Housing opened in March of 2013. Data gathered prior to their opening is used for benchmarking purposes.

*Denotes months when the Downtown Fellowship of Ministries and Churches collaborated with the Clean & Safe program on the monthly homeless sleep count.

**East Village breakout areas include the following:**

- North East East Village refers to the area north of Market Street & east of Park Ave.
- North West East Village refers to the area north of Market Street & west of Park Ave.
- South East East Village refers to the area east of Park Ave. south of Market Street
- South West East Village refers to the area west of Park Ave. south of Market Street

On April 27, 2017, the Clean & Safe program adopted the methodology used by the Regional Task Force on the Homeless to count homeless individuals. The methodology involves counting visible and hand-made structures, tents, and vehicles, and multiplying by an adjustment factor. For the methodology, a clean & safe staff will count 1.35 individual per vehicle that shows clear signs of tent/structure, and 2.03 individual per vehicle that does not show clear signs of tent/structure. Clean & Safe staff will count 1.75 individual per visible vehicle.

The breakdown is as follows:
- **Total** = 2.03 homeless individuals in vehicles
- **Total** = 1.75 homeless individuals in structures/tents

Date: **6/28/18**

Churches & Ministries of Downtown Fellowship — **Core**
On April 27, 2017, the Clean & Safe Program adopted the methodology used by the Regional Task Force on the Homeless to count homeless individuals. The methodology, known as the "Count & Tally," involves counting individuals and vehicles that are visible within certain time periods. The count includes homeless individuals in tents, hand-made structures, and vehicles. The tally includes all vehicles, regardless of whether they are occupied or not. The methodology is designed to provide a comprehensive count of homeless individuals in the region, ensuring that all individuals are counted regardless of their location or mode of shelter.
On April 27, 2017, the Clean & Safe Task Force conducted a Homeless Count Breakdown by the Regional Task Force on the Homeless to count homeless individuals used per methodology. Clean & Safe staff will count 1.75 individuals per visible tent/structure and 2.03 individuals per vehicle that shows clear signs of habitation.
